Guide for the Care and Use of Laboratory Animals: Eighth

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

Experiment - Wikipedia

The Jet Propulsion Laboratory (JPL) is a federally funded research and development center and NASA field center in La Cañada Flintridge, California, United States, though it is often referred to as residing in Pasadena, California, because it has a Pasadena ZIP Code.. Founded in the 1930s, the JPL is currently owned by NASA and managed by the nearby California Institute of Technology (Caltech ...

Jet Propulsion Laboratory - Wikipedia

We advance fundamental research in nuclear and particle physics to gain a deeper understanding of matter, energy, space, and time; apply photon sciences and nanomaterials research to energy challenges of critical importance to the nation; and perform cross-disciplinary research on computation, sustainable energy, national security, and Earth's ecosystems.

The laboratory performs research in a close co-operation with the Paul Scherrer Institute (PSI) in the field of single- and multi-phase flows in nuclear power installations. Beside applied topics, studies of fundamental thermal fluid-dynamic phenomena are part of the research activities. New test facilities are planned, which will be equipped with high-resolution two-phase instrumentation.
