land use changes causes pdf

Land use, land-use change, and forestry (LULUCF), also referred to as Forestry and other land use (FOLU), is defined by the United Nations Climate Change Secretariat as a "greenhouse gas inventory sector that covers emissions and removals of greenhouse gases resulting from direct human-induced land use such as settlements and commercial uses, land-use change, and forestry activities."

Land use, land-use change, and forestry - Wikipedia

Land degradation caused by mining as it cause landslides Land degradation is a global problem largely related to agricultural use. Causes include: Land clearance, such as clearcutting and deforestation; Agricultural depletion of soil nutrients through poor farming practices; Livestock including overgrazing and overdrafting; Inappropriate irrigation and overdrafting

Land degradation - Wikipedia

Major land–use changes have occurred in the United States during the past 25 years. The total area of cropland, pastureland and rangeland decreased by 76 million acres in the lower 48 states from 1982 to 2003, while the total area of developed land increased by 36 million acres or 48%.

Highlights On a per area basis organic farming, generally, has low environmental impacts. The benefits of organic farming are reduced when using product unit comparison. High levels of variation exist within both organic and conventional systems. Modelling studies tend to overestimate the benefits of organic farming. The relative impacts of the systems vary between different product groups.

4 FEEDING PEOPLE, PROTECTING THE PLANET Introduction The world's food and agricultural systems have succeeded in feeding more people than ever before.

Feeding people, protecting the planet - fao.org

1.2 Land as a fundamental resource. The food system exerts a broad range of ecological impacts. Biodiversity loss, climate-forcing emissions, nutrient cycle disruption, and competition for land, water, and energy are all cited as reasons to contain agriculture's environmental impact (Godfray et al., 2010; Foley et al., 2011). Among these impacts, land use is central.
