Financial support available Feb 22, 2019. Applications for financial support can be submitted by Apr 1, 2019. Details on eligibility and the application procedure can be found on the webpage linked below.

ICCOPT 2019

In computer vision, image segmentation is the process of partitioning a digital image into multiple segments (sets of pixels, also known as super-pixels).The goal of segmentation is to simplify and/or change the representation of an image into something that is more meaningful and easier to analyze.

Image segmentation - Wikipedia

Open source Python Library for Modelling and Inversion in Geophysics. • Several levels of complexity for different user entry points. • Fully coupled hydrogeophysical inversion for time lapse ERT measurements.

I'll need to make some software updates to the Arduinos, but the original Arduino sketches are posted on my download pages. I want to improve the handshaking, auto detect the arduinos, and process HPGL files better, plus make a better GUI.

Siliconfish: Arduino XYZ CNC / 3D Printer Do-over

1 Overview. Gmsh is a three-dimensional finite element mesh generator with a build-in CAD engine and post-processor. Its design goal is to provide a fast, light and user-friendly meshing tool with parametric input and advanced visualization capabilities.
